

## Do's and Don'ts for your HD METAL PRINT

### THINGS TO DO – DO'S to enjoy your HD METAL PRINT for years.

- Clean your hands with liquid dish soap or a good hand cleaner a few times and dry your hands before handling. Use a microfiber cloth and handle the print by the edges.
- Use compressed air or a can of compressed air (in the upright position) for removing dust.
- **REMOVE DUST** if possible before using a microfiber cloth that has been inspected for foreign matter.
- Use a **CLEAN QUALITY microfiber cloth** for lightly cleaning the surface. Wash microfiber cloth after use.
- Only use **WATER** in mister spray bottle for cleaning and dry immediately to avoid water marks.
- **ONLY USE** the supplied brackets (proper long screws and maybe plugs are needed) for securely hanging. Home Depot or a local hardware store can help determine what is needed for your wall type.
- If you are packing the print up for moving or shipping, use hardboard or ridged Styrofoam with 2+ inches or more around all edges. Placing the print face down on felt or towel placed on a hard or ridged surface is advised.
- Metal prints can be displayed in humid areas unlike paper-based photographs.
- For larger prints use an assistant if needed and do not mount yourself if experiencing balance issues.
- If using a ladder to mount brackets or to hang the metal print, follow safety protocols listed on the ladder.
- **If you are hiring or getting someone else to hang or mount your metal print, have them read this sheet before touching the metal print and installing the hanging brackets.**
- Treat your metal print like your **grandmother's best china or figurines.**
- **Enjoy** - Thank You for purchasing a Metal Print by **ARTographer Ric Wallace**

### Things NOT TO DO – DON'TS

- **DO NOT** use cleaners or solvents – **ONLY WATER** in mister spray bottle.
- **DO NOT DROP** your metal print, as aluminum can easily bend – mount securely.
- **DO NOT** display your metal print in an area undergoing renovations – **Drywall & sawdust can be abrasive.**
- **DO NOT** display in direct sunlight or expose to heat.
- **DO NOT** display in an area where wind or wind gusts could lift the metal print from the brackets.
- **DO NOT** install over heating or cooling vents, as they could be a source of dust and wind or air flow.
- **DO NOT** have the metal print on a horizontal surface and then place items on top.
- **DO NOT** use paper towels or tissues which are abrasive to the specially coated metal surface.
- **DO NOT** allow people to touch the surface with hands, fingernails, knuckles, sticks, pointers or hard objects, etc.
- **DO NOT** use pressure or scrubbing when using a microfiber cloth – lightly touch the surface.
- **DO NOT** place in an area where doors, furniture, handheld vacuum cleaners, or cleaning staff will come in contact or bump the surface or edges of the print.
- **DO NOT** display where people can bump it while wearing a coat or turning around with a backpack or purse.
- **DO NOT** display in a play area where items may be thrown at the metal print.
- **DO NOT** display at a height where children may be able to touch the surface.
- **DO NOT** display in an area with grease vapors that may coat the surface of the print (kitchen areas).
- **DO NOT** eat French fries or greasy foods with your fingers and touch the metal print or microfiber cloth to be used on a metal print.
- **DO NOT** use a **chair** for standing on. Use a safety ladder if hanging the metal print at an elevated height.

## Do's and Don'ts for your HD ACRYLIC PRINT

THINGS TO DO – DO'S to enjoy your HD ACRYLIC PRINT for years.

- Clean your hands with liquid dish soap or a good hand cleaner a few times and dry your hands before handling. Use a microfiber cloth and handle the print by the edges.
- Use compressed air or a can of compressed air (in the upright position) for removing dust.
- **REMOVE DUST** if possible before using a microfiber cloth that has been inspected for foreign matter.
- Use a **CLEAN QUALITY microfiber cloth** for lightly cleaning the surface. Wash microfiber cloth after use.
- Only use **WATER** in mister spray bottle for cleaning and dry immediately to avoid water marks.
- USE proper brackets/hangers (proper long screws and maybe plugs are needed) for securely hanging. Home Depot or a local hardware store can help determine what is needed for your wall type.
- If you are packing the print up for moving or shipping, use hardboard or ridged Styrofoam with 2+ inches or more around all edges. Placing the print face down on felt or towel placed on a hard or ridged surface is advised.
- For larger or heavy prints use an assistant if needed and do not mount yourself if experiencing balance issues.
- If using a ladder to mount brackets or to hang the acrylic print, follow safety protocols listed on the ladder.
- **If you are hiring or getting someone else to hang or mount your acrylic print, have them read this sheet before touching the acrylic print and installing the hanging brackets / hangers.**
- Treat your acrylic print like your **grandmother's best china or figurines.**
